

Job Title: Senior Technologist, Instrumentation & Electrical Systems
Competition #: SW-03-2025 (Repost)
Location: Regina, Saskatoon, or Moose Jaw
Salary: \$39.73 to \$49.67 (Pay Grade 10)

Immerse yourself in a team committed to creating trusted and sustainable water solutions for a vibrant Saskatchewan. A team backed by a corporation with over 60 years of experience providing water and wastewater services. That's a lot of knowledge.

But there's more. SaskWater offers an attractive benefits package including employer-funded health, dental and vision benefits, pension, and disability insurance, plus vacation leave, earned days off, and paid family leave and sick leave. At SaskWater you can take advantage of extras such as flexible work options, a tuition reimbursement program, employee family assistance plans, maternity leave top-up and more. H2Wh0a!!

Now that's refreshing! Apply today.

As the Senior Technologist, Instrumentation & Electrical Systems, you will undertake the servicing of the electrical and instrumentation operation and maintenance components of district water and wastewater systems. These systems include a diverse complement of treatment plants, pumping stations, distribution pipelines and other related works that vary in size, complexity, technology, and operation. You will, at times, be required to work standby.

To qualify, you will have an Instrumentation Engineering Technology or Electrical/ Electronics Engineering Technology Diploma and/or Journey person status with related controls experience; certification with Saskatchewan Applied Science Technologists and Technicians (SASTT) as an Applied Science Technologist (A.Sc.T.); and six years of progressively responsible experience in the following areas:

- Thorough knowledge and understanding of controls, VFD and PLCs.
- Thorough knowledge of design, installation, operation, manufacturing and maintenance of electrical and industrial control equipment and power, mechanical and HVAC systems used in water and wastewater systems; and knowledge of regional system operation and maintenance procedures including pipeline, pump, control valve, VFD, HMI and PLC systems experience including fluids, pressures, etc., and associated reaction of fluids under different circumstances; must have knowledge of Occupational Health and Safety with regards to industry standards; knowledge of process systems and on site project management is desired.
- Working knowledge and experience in Ethernet.
- Demonstrated experience in PLC to PLC Communications.
- Ability to write letters, reports and inspection reports; and oversee contractors and tradespersons hired to undertake maintenance work.
- Ability to develop and prepare written procedures and operations manuals.
- Ability to establish and maintain effective working relationships with staff, external customers and service suppliers; and to promote and maintain a positive corporate climate.
- Strong computer skills with a working knowledge in the use of Microsoft Word and Excel.

Special Requirements: *The position requires the incumbent to undergo a Criminal Record Check and Drug and Alcohol test. You must be legally entitled to work in Canada. A valid Saskatchewan driver's license is required.*
